In this day and age of going green I cannot believe that someone would want to stop composting and start taking yard waste back to the dumps. My understanding was to try to stop alot of stuff from going to the dumps by recycling and now we have individuals wanting to go back to the old ways, does not make sense. By doing this we will over fill our already full waste sites, we will eliminate jobs and businesses all for what????? These compost businesses are an asset to our communities and I encourage you and your committee to vote no on these bills...Thank You

Sincerely  
Paul VanVelzen
